Dear Doctor Ierusalinski:

I have just received your letter of March 1.

I am sorry to learn that you are unable to come to Florence. But thank you very much for letting me know your plans. I had hoped that we might have an occasion to discuss the problems of exobiology. If there was not time to do this at the COSPAR meeting next month, perhaps we might review the possibilities of a later occasion. I am looking forward to hearing your own suggestions about this.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
